

Dear friends of EM,
as already announced in our last NEWS the following releases are available now:

new releases

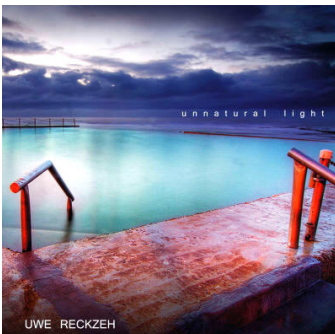

moonbooter - COSMOCLIMAX

With „Cosmoclmax“ moonbooter proves that his typical rhythm-oriented and danceable Electronic Music also works in a lying position. What does that mean: The music of his latest album has been composed for a live-concert at Planetarium Bochum, which Bernd presented in public first on February 14th, 2009 to a capacity crowd. With melancholic melodies, driving percussions, broad choirs, catchy sequences and a skilful mixture of electronic and acoustic sounds moonbooter abducts us to unknown galaxies. Each song holds several bows and mostly ends differently than expected after the intro. At first, some songs sound trendy but then end up in a homage to classical EM. This time, Bernd approaches his typical theme “space” in a different way this time and leaves technical aspects far behind. Concerning sound, “Cosmoclmax” offers to the interested auditory a special transparency and many hidden details, which make this album an exciting experience also after repeated hearing. “Cosmoclmax” is music to dream, feel and experience.

Uwe Reckzeh - unnatural Light

On his seventh album Uwe Reckzeh again shows in an impressive manner, how Electronic Music can sound in the 21st century. More than two years the master has worked on his songs and once more created unique masterpieces who can easily cope with the big EM productions. Experimental parts are missing. More than that, Uwe’s complex-hypnotic sequencer lines and catchy melodies fascinate. Besides traditional elements Uwe refreshes his music with modern sounds, but hides them somehow timid in the background. The theme of this CD is light with all its related associations like warmth, speed and energy. The music immediately surrounds the listener with a comforting mood, which invites to dream. Depending on the own personal mood, each song holds the power to transform and to accompany with this mood...just “unnatural”.

Stefan Erbe - Inside the Images

Stefan Erbes music is a mix of different styles and influences. Regarding the first CDs “the cosmic Dreamland and Light of sirius” erbe started his exploration with a combination of EM-Style, melodic elements, “crispy” beats and “tricky” sequenzer parts. Inside the images ist the first CD after 15 Years that included the old “fashion” of the first two productions. The Music was composed for the astrophotographic exhibition.”vom Ruhrgebiet in den Himmel” (from ruhr valley into the sky). Stefan will perform this music only one time at the planetarium bochum. The exhibition ends in autumn 2009.

Audio-CD | 76:30 | zz-dis008 | produced by Stefan Erbe

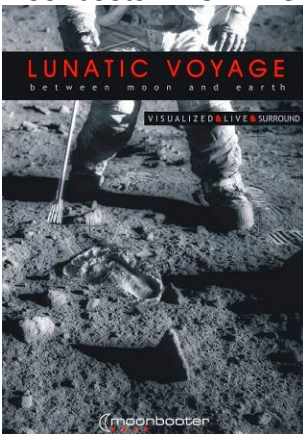

Elektrohandel - GLEICH BLEIBEN

The fourth longplayer from Elektrohandel offers you a well stirred melange of dreamy melodies and playful compositions on 13 Songs. Hooking up on their successful releases on “IC/DigIt Music” (Hesse / Drewes), “Novatune” and “MellowJet”, Elektrohandel present themselves more friendly and honestly then ever before.

Audio-CD | 71:32 | zz-dis009 | produced by Elektrohandel

moonbooter - LUNATIC VOYAGE The DVD

Lunatic Voyage -THE DVD is the visualized version of the similarly named CD-album from moonbooter. Additionally to the stereo-tracks all songs were mixed in 5.1 Surround-Sound. In the menu you can find a lot of additional videos from moonbooter's live-cencerts. There are no live videos but animations and films which are part of all moonbooter concerts.
