
We proudly like to announce You some of our latest releases:

Erez Yaary - Ambience cdr-ey0901

It is all around us, ambience. A notion of distance and proximity that we all get its vibes. It can be as big as the air around us or as small as the space between two atoms, it can reside above the ground, under or inside it. Wherever it is, and whomever it affects, it has a grave impact on our world, both physically and spiritually. This album captures the essence of ambience in some of its forms, brings to the listener a grasp of its true nature.

Harald Nies - Cryptic Labyrinth cdr-hn0901

"Cryptic Labyrinth" is spacemusic as You will like it: pulsating sequences a'la Chicane, soft rhythmic beats and in between Harald's rockin' electronic guitar. Although his music is soft, warm and melodic, it is not cheesy at all. On "Delay Rama" is a special track for spacerock-fans. The artists show s with this track what can happen if You will play a single guitar with different reverb-rooms. The album was produced in 2008 and is now released for the first time.
